

# Process & Decision Documentation

## Project/Assignment Decisions

This side quest the main decision I made was how to organize and setup VS Code and Github. I made sure the integration was working smoothly by testing local file edits, pushing updates, and confirming that everything was deployed correctly. Now that I know everything is synced properly, future assignments and sidequests will be able to run efficiently.

### Entry Header

Name: Jason Pham

Role(s): Lead

Primary responsibility for this work: Jason Pham

### *Goal of Work Session*

Setup VS Code Environment and sync Github

### Tools, Resources, or Inputs Used

- Lecture notes
- VS Code
- Github
- Github Pages

### *GenAI Documentation*

No GenAI used for this assignment.
